Education

Sershash Engineering Collage, Sasharam
B.Tech. in Computer Science and Engineering

Oct 2022 - May 2026

RB Collage, Dalsingsaray
Science P C M

May 2018 - July 2020

JPNS Narhan
High School

March 2017 – April 2018

Work Experience

CISCO | Remote

Introduction to Cybersecurity

26 Nov 2022

- Cisco's approach to threat detection and defence.
- Opportunities available for pursuing network security Certifications.
- Ways in which networks are vulnerable to attack.
- Impact of cyber-attack on industries.
- Global implications of Cyber threat.

East Central Railway | Hajipur (Bihar)

Internship at S&T Deptt ECR, Danapur

02 June 2025 – 29 June 2025

- Core activities of Railways like :-
 - **Telephone Exchange, Optical Fibre Communication, Quad Cable Communication,**
 - **Public Announcement System, PRS/UTS working System,**
 - **Mobile Train Radio Communication, etc.**

Skills

-
- **Programming Languages:** C, C++, Python, Java
 - **Libraries/Frameworks:** JavaScript, Node.js, HTML, CSS, Bootstrap, pHp, Flask, TensorFlow, Numpy, Pandas, Matplotlib, Seaborn, OpenCV, CNN, Keras
 - **Tools / Platforms:** Git, VS Code, Google Colab, Jupyter Notebook, IntelliJ, Spyder, Arduino IDE, Power BI, Tableau
 - **Databases:** SQL, MongoDB, JDBC

Projects

▣ Cricket Score Predictor

- The Cricket Score Predictor Using Machine Learning project is designed to predict the final score of a cricket team using historical cricket match data and current match conditions. The system uses the XG-Boost Regressor machine learning algorithm to analyze important factors such as runs scored, wickets lost, overs completed, run rate, batting team, and bowling team for accurate score prediction.
- The project is implemented using Python along with libraries such as Pandas, NumPy, Scikit learn, Matplotlib, and XG-Boost. Historical cricket datasets are collected, cleaned, and processed before training the machine learning model. The trained model learns match patterns and predicts the expected final score efficiently.
- The system provides fast and reliable score predictions that can help cricket analysts, commentators, fantasy league users, and sports enthusiasts in match analysis and decision making. Compared to traditional statistical prediction methods, the proposed system improves prediction accuracy and processing speed through intelligent data analysis techniques.
- This project demonstrates the practical application of Machine Learning in sports analytics and real-time prediction systems. Future improvements may include live API integration, player performance analysis, and advanced deep learning techniques for more accurate cricket score prediction.

Certificates

- **East Central Railway** – Certification in Core Activities of Railway
- **Aagaaz Training Centre** - Certification in Cloud Computing
- **NPTEL Online Certification** – Introduction to Internet of Things
- **Data Science and Machine Learning** from **Ybi Foundation**
- ROBOTICS from **BlinkSkills**
- Python Certification from **Skills4India**
- Java Certification from **LearnTube.ai**
- Introduction to Cybersecurity by **CISCO**
- Introduction to Computers Training by **IIT Bombay**
